

mesa2 - chouchou reference, hand-local (LEFT hand)

100.0 mm - print at 100%, no scaling

Chouchou's 10 left-hand keys, drawn 1:1 with its unibody angle removed (hand-local frame).
This is the layout you already printed - use it to mark CORRECTIONS rather than absolute positions.
1. Tape down. Ink the fingertips. Rest the hand over the ghosted keys as if typing, and tap.
2. Where each dot falls relative to its cap centre is the correction, read straight off the grid.
3. For the thumbs, tap the comfortable arc rather than aiming at the two drawn keys.
Cap centres in this sheet's grid coordinates are listed in CHOUCYOU.md. Leave the palm area below clear.

origin (0,0) at the red cross - X to the right, Y toward you
